

PRICE STRUCTURE FOR SOLAR SITE ASSESSMENT SERVICES*

BASIC ASSESSMENT SERVICE \$250 + HST

Basic Assessment Service includes:

- ❖ Suitability of your home to Solar Technologies based on the positioning and architecture of your home, and the availability of solar suitable space on its roof and wall surfaces
- ❖ Solar energy potential of your home – this will provide you with reliable data on how much solar radiation is available on the suitable roof and wall surfaces and how much of that radiation is lost due to the surrounding obstructions.
- ❖ The choice of one best fit solar energy technology[†] to use for hot water heating, space heating and electricity generation based on your current energy mix, general structure of your home, and your solar budget.
- ❖ Solar system cost and return on investment assessment - this will allow you to make the informed decision on economic viability of solar energy supply for your home

ADVANCED ASSESSMENT SERVICE \$350 + HST

Includes the items listed in *Basic Assessment Service* outlined above and adds the second applicable solar technology[†] into the analysis of a prospective home energy mix.

COMPLETE ASSESSMENT SERVICE LEVEL 3 \$400 + HST

Includes items listed in *Advanced Assessment Service* outlined above. *Complete Assessment Service* includes comprehensive analysis of all applicable solar technologies[†] for a prospective home energy mix, their costs and return on investment.

[†]SOLAR TECHNOLOGIES ARE DEFINED AS:

- Solar water heating
- Solar air heating
- Solar photovoltaic electricity generation

*Conditions applied:

1. The fees above relate to services within **Halifax Regional Municipality (HRM)**.
2. Projects outside HRM are priced as follows:
 - One-hour drive is additional \$100
 - Two-hour drive is additional \$200
3. Any further is a special case treated on a per case basis
